

ANUNJIN BATDELGER

New York, NY | 571-338-9532 | anunjinanun@gmail.com | [LinkedIn](#) | [Portfolio](#) |

EDUCATION

Bachelor of Science in Computer Science

Graduated: May 2026

Gannon University — Erie, PA

EXPERIENCE

Product Founder & PM – [BogdAI](#)

March, 2026 - Present

- Architected an end-to-end AI-powered SaaS platform leveraging Azure OpenAI foundational models, translating healthcare compliance risk signals into actionable data for non-technical buyers.
- Designed agentic AI workflows using LangChain for automated data routing and validation pipelines, enabling rapid 0-to-1 product iteration from concept to live landing page.
- Integrated REST APIs and webhooks to capture user demand signals and track funnel conversion metrics, establishing observability from day one.
- Applied CI/CD practices via GitHub Actions to maintain deployment velocity while iterating on AI-driven workflow automation.

Product Management Intern | Tellus App Inc

Remote | May – August 2025

- Conducted monthly boost performance analysis across user segments, identifying high-impact vs. underperforming cohorts and surfacing gaps that informed roadmap prioritization.
- Translated user research and segmentation insights into actionable roadmap priorities, contributing to a 15% increase in feature adoption.
- Collaborated cross-functionally across product, engineering, and operations to deliver data-driven solutions to open-ended business problems
- Presented roadmap recommendations and performance findings to leadership, influencing strategic planning in a fast-paced remote environment.

Software Engineering Intern | TechnipFMC

in Office | May 2024 – March 2025

- Designed and documented the company's first automated testing framework, creating training materials and process guides that enabled non-technical stakeholders to understand test outcomes and accelerate release cycles.
- Developed real-time logging and auto-generated result reporting, giving engineers instant visibility into test outcomes and accelerating release cycles for enterprise systems.
- Wrote shell scripts and integrated with internal APIs to automate test execution across enterprise systems, demonstrating the ability to navigate complex technical environments independently.
- Served as de facto technical advisor during rollout, documenting processes and best practices to ensure knowledge transfer across engineering teams.

PROJECTS

[Bug Prioritization System - Spot Fixes](#) — Senior Design Project

Fall 2025 – Spring 2026

- Architected a multi-tenant SaaS platform using React, FastAPI, and Supabase with Row-Level Security (RLS) for isolated, enterprise-grade data environments — directly analogous to DocuSign's multi-org agreement infrastructure
- Engineered an ML pipeline using Random Forest and TF-IDF achieving ~95% bug classification accuracy, with a human-in-the-loop retraining system for continuous model improvement
- Built a RAG-based search engine with TF-IDF cosine similarity for real-time duplicate detection across 222k+ records, backed by an automated ETL pipeline syncing live Bugzilla data
- Designed a secure REST API with JWT authentication and RBAC, including admin workflows for bulk data ingestion and enterprise approval queues.

VeriWell — AI Wellness Coach — HackHarvard 2025

October 2025

- Led end-to-end product design and prototyping of a production-ready AI wellness coach in 48 hours
- Integrated Gemini API to generate personalized wellness insights, translating user needs into functional product features and validating concepts with live demos.

TECHNICAL SKILLS

AI & Agentic AI: Azure OpenAI, LangChain, Gemini API, RAG pipelines, LLMs, NLP, foundational model integration, agentic workflow design

Cloud & DevSecOps: Azure (Azure OpenAI, Entra ID), Docker, Kubernetes, GitHub Actions (CI/CD), infrastructure automation

Engineering & APIs: Python, FastAPI, REST APIs, Webhooks, JWT/RBAC, OAuth 2.0 concepts, SQL, Supabase

MLOps & Observability: ML pipeline design, model evaluation, human-in-the-loop retraining, logging, performance monitoring

Frontend & Tooling: React, GitHub Copilot, Cursor, Claude Code, low-code/no-code prototyping

LEADERSHIP & CAMPUS INVOLVEMENT

CodePath Emerging Engineers Summit (EES), NYC — *Selected Participant / Feb 2025*

CodePath AI Engineer Program | *Feb 2026 – Present*
